

REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional):
BSI-430US8

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventor(s) named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 5,855,598, granted January 5, 1999, and for which a reissue patent is sought on the invention entitled

EXPANDABLE SUPPORTIVE BRANCHED ENDOLUMINAL GRAFTS, the specification of which

☐ is attached hereto.

☒ was filed on September 5, 2000 as reissue application number 09/657,041 including the Terminal Disclaimer Filed on October 1, 2003, and such specification was amended on October 1, 2003, June 8, 2004, July 12, 2006, and October 23, 2006.

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

Issued claim 1 recited "a trunk liner . . . having a generally cylindrical upper body portion, at least two leg portions, and a generally cylindrical lower body portion. . . ." Claim 1 is unduly narrow, in that claim 1 should instead recite "a trunk liner . . . having a generally cylindrical body portion and two leg portions. . . ."

Issued claim 25 recited a "method for making a multi-component bifurcating expandable supportive endoluminal graft, comprising the steps of . . . inserting [a] seamed liner. . . ; [and] inflating the seamed liner. Claim 25 is unduly narrow, in that the specification teaches simply a method of forming a supporting component comprising the steps of forming a support component and crimping at least a portion to provide a multiple lumen portion, as recited in claim 31.
